UNIVERSITY

ELEVATING
THE ART AND SCIENCE
OF EARLY DETECTION

Radiologic technologists (RT) undergo paid, on-the-job training to become exceptional mammography technologists.

- In six months, gain all clinical and educational requirements to earn ARRT advanced certification in mammography
- All training expenses covered
- Experienced mammography technologists as clinical preceptors
- After certification, **guaranteed mammography technologist position** with Solis Mammography
 - Work **business hours** Monday through Friday, rotational Saturdays with weekend shift differential pay and no call
 - **Competitive pay** and **comprehensive benefits**
 - **Four-weeks paid time off** and eight paid holidays a year

Mammography Technologist Training Program

Grow your future with us. Are you:

An experienced RT who would like to transition into mammography?

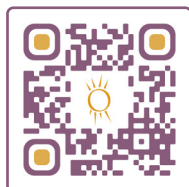

- You will be **hired and paid** as a mammography technologist trainee
- Undergo **40 hours of classroom coursework** and **clinical practicum** (classes held monthly in cohort groups)

An RT who has completed mammography coursework and needs clinical experience?

- If you're an RT who has completed 40 hours of mammography coursework, **we'll give you the clinical experience you need**
- You will be **hired and paid** as a mammography technologist trainee

A new RT graduate with no mammography education or clinical experience?

- You'll receive **40 hours of mammography classroom coursework** and **clinical practicum** (classes held monthly in cohort groups)
- You will be **hired and paid** as a mammography technologist trainee
